### Current rates as of July 1, 2019

This table compares electricity costs for an average commercial customer in the EBCE/PG&E service area with an average monthly demand of 620 kilowatts (kW) and an average monthly usage of 263,181 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on the E19S rate schedule for PG&E's and EBCE's published rates as of July 1, 2019.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both EBCE and PG&E customers.

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider like East Bay Community Energy. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

If this comparison does not address your specific rate, please visit PG&E online at [pge.com/cca](http://pge.com/cca) or call 1-866-743-0335. For more information on EBCE's generation rates, please visit [ebce.org/rates](http://ebce.org/rates) or call 1-833-699-EBCE (3223).
